

Appearance inspection taping machine VIT-420-1

Strong Point High-speed inspection enables taping with stable quality.

We have developed a custom-made device. Appearance inspection taping equipment for semiconductor post-process. It is a device that takes out the product from the magazines, inspects the appearance, and then performs taping. We will introduce as follows.

We would appreciate it if you could inquire about details, other custom-made equipment, orders for jigs and tools, etc. Please contact us using the inquiry form on our website or by calling the Tendo office.
